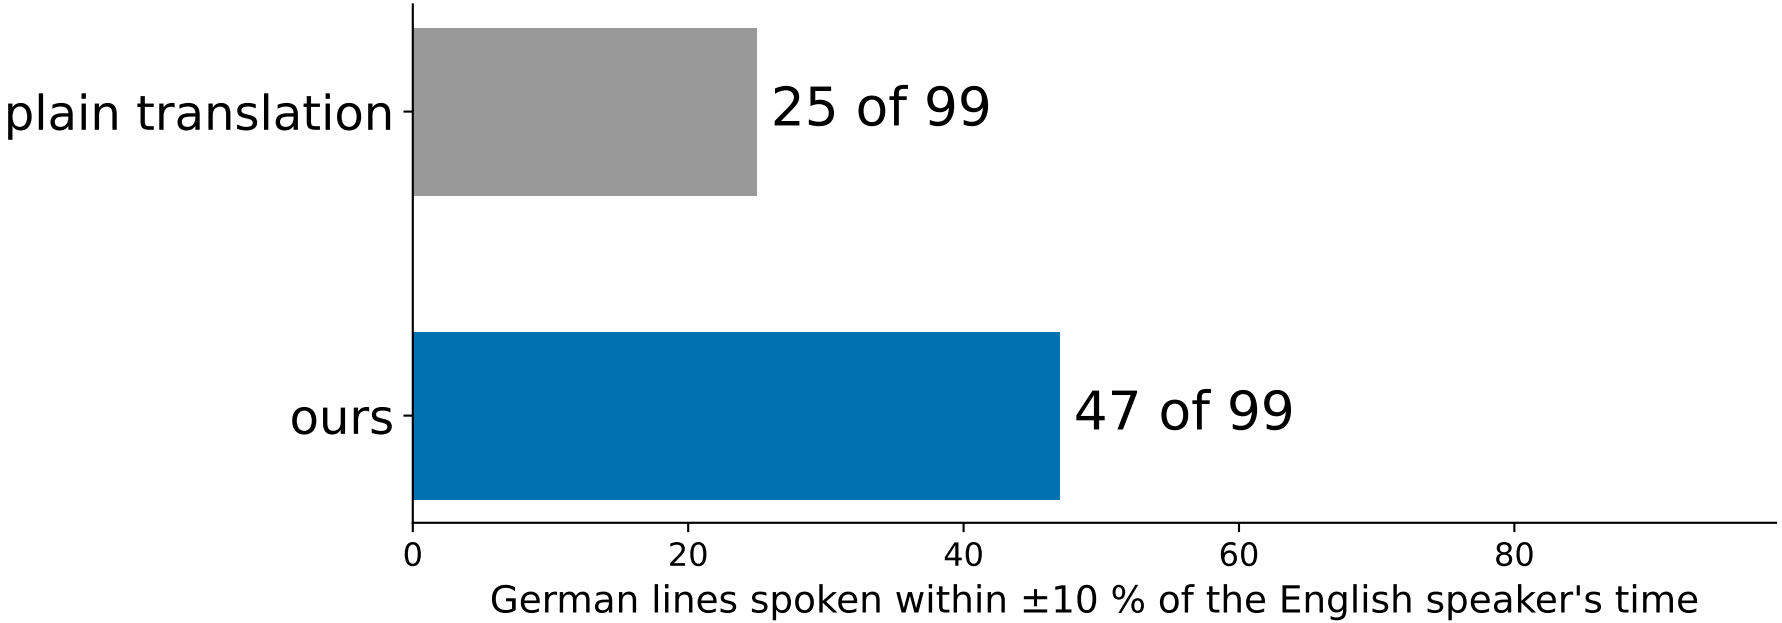
Timed with one synthetic voice, budget calibrated to it

99 German FLEURS test lines, read by Qwen3-TTS (preset Aiden).
Syllable budget = the English speaker's time ÷ 0.231 s per syllable (the voice's rate on dev lines).



Paired: ours fits where plain does not in 22 lines, the reverse in 0 (exact McNemar p = 4.8e-07).
Exploratory, added after the test outputs existed.
